

Rabindra Adhikari

Java Developer

✉ raj242adk@gmail.com ☎ [9814922873](tel:9814922873) 📍 Nepal [in](#) [LinkedIn](#)

Summary	Motivated backend developer experienced in building scalable applications using clean, maintainable code, with strong skills in REST APIs, event-driven systems, and modular backend architecture.		
Profiles	 raj242adk  rabindrazph  medium		
Experience	<u>Zakipoint Healthcare</u> Java Developer Sanepa,Lalitpur April 2024 - Present • Worked on zAnalytics with dynamic cohort-based member filtering for dashboards and population page reporting. • Contributed to eEnrollment project for managing employee and dependent enrollment workflows. • Built and enhanced zConnect (Grails) features like member ID card, EOP card, and profile updates with centralized authentication using Keycloak and Kafka-based messaging. • Optimized slow relational database queries by migrating to Elasticsearch, improving response time for zAnalytics dashboard APIs. • Monitored applications using Prometheus, Loki, and Grafana for logging, metrics, and performance tracking, improving debugging and system stability. <u>eSewa Pvt. Ltd</u> Java Internship Pulchowk , Lalitpur December 2023 - March 2024 • Developed and optimized Java/Spring Boot REST APIs with secure JWT authentication and improved application performance using clean design practices. • Integrated Angular frontend with backend services, handling components, services, routing, and ensuring smooth, responsive user experience.		
Education	College of Applied Business Bachelor's	Bsc.CSIT • 74% 2019-2024	
Projects	<u>Banking-Service</u> • Built a modular monolithic backend project using Spring Boot 4.0 with scalable architecture design. • Implemented centralized security using Keycloak for authentication and authorization. • Integrated Kafka messaging system with dead-letter queue (DLQ) service for reliable event processing and failure handling. • Used Prometheus, Loki, and Grafana for monitoring, logging, and system observability, improving debugging and application stability. • Configured CI/CD pipeline using Jenkins for automated build, test, and deployment, and used Prometheus, Loki, and Grafana for monitoring, logging, and system observability.		
Skills	Java OOP, Java 8, Stream API, Collection Framework,Exception Handling Springboot Spring MVC, Spring Data Jpa, Spring Data Elasticsearch, Annotations, Elasticsearch Java Client, JUnit. Security Basic Security, JWT, Keyclock Elasticsearch Sorting, Pagination, Aggregation ,Kibana Dashboard Database MySQL, H2, Redis, Cloud database Frontend Angular,React Version Control, Jira, OpenProject Good experience in version control and collaborative software development like Git and github. Observability Prometheus (Metrics), Grafana (Visualization & Dashboards), Loki (Logging)
